

Good morning,

I want to pass along some new information to our Kids Cove families. As you know, Kids Cove consists of children newborn through 5th grade. This is the 11 and under age group that are not able to be vaccinated against the Covid virus. As time has passed, many of our families have expressed a desire to bring their kids to church, but don't feel safe doing so in the current environment. While we are very aware of the controversy involved in requiring masks, we feel as a church that we should have the heart and mindset of helping protect those that aren't able to choose to be vaccinated. I know that not everyone will be in agreement with this decision, but we are trying to be wise and err on the side of caution and protection for the kids. We are looking at holding this requirement in place for preschool children through 5th grade through the end of October. We will reevaluate at that point. Thank you for your grace during this difficult time.
